Imaging, Power & Cements

01 IMAGING • AUTHORISED DEALER

Remescan REMEX-KA6 Portable X-Ray

FULL SPECS P.03

- Generator body
- Hand strap
- Collimator cone
- Radiation indicator

A **handheld, battery-powered X-ray** you take to the patient. It captures diagnostic images in seconds in the OT, ICU, ER or at the bedside, so the patient never has to be moved to radiology.

USED IN **OT** **ICU** **Emergency** **Bedside** **Camps**

2.4 kg Total weight
40–70 kV Tube potential
200+ Scans per charge

02 POWER INSTRUMENTS • AUTHORISED DEALERSHIP

BELL Saw & Drill Kit

- Saw handpiece
- 18 V batteries
- Sterilisation case
- Drill handpiece
- Bits & attachments

A **complete cordless power set** for cutting and drilling bone. Saw and drill handpieces, rechargeable batteries and attachments arrive in their own sterilisation case, ready for theatre.

USED IN **Trauma** **Arthroplasty** **Spine**

Autoclavable Handpieces
Dual battery Option
Calibrated Speed & torque

03 POWER INSTRUMENTS • MULTI-OEM CURATED

Reciprocating Saw Kit

- Reciprocating saw handpiece
- Battery charger
- Saw blades
- 2 × rechargeable batteries
- Aseptic battery housings

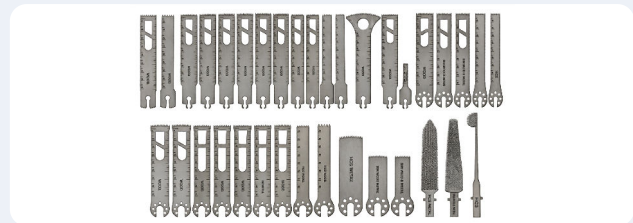

Ready-to-use saw and drill sets laid out on a surgical tray, configured for your joint-replacement, trauma or spine lists. High-torque motors handle dense cortical bone.

USED IN **Arthroplasty** **Trauma** **Spine**

High torque Motors
Balanced For long cases
Per list Set configuration

04 CONSUMABLES • STERILE-PACKED

Saw Blades & Drill Bits

- Sagittal & oscillating blades
- Drill bits
- Reciprocating blades
- Single-use sterile pouch

Single-use sterile blades and drill bits that fit the major power systems. Each one is sharp, batch-traceable and kept in stock for fast reorder.

FITS **BELL** **Biotech** **Stryker** **Synthes**

Sterile Single-use
Traceable Batch-coded
24–48 h Reorder dispatch

05 THEATRE EQUIPMENT • BELL PULSE PACK

Pulsa Lavage: Irrigation & Debridement

- Hand piece, built-in battery
- Coaxial canal tip
- 30 mm cone tip
- Fully disposable, single-use

Cleans wounds and bone surfaces with a pulsing jet of saline, washing away debris and bacteria before an implant is placed or the wound is closed. Pressure is adjustable for gentle or deep cleaning.

USED IN **Joint replacement** **Trauma** **Open wounds**

Built-in Battery pack
No cable No shock risk
Single-use Fully disposable

06 CEMENTS • PALACOS BRAND

PALACOS Bone Cement

- Cement pack: powder + liquid
- Applicator cartridge
- Mixing bowl

Medical-grade bone cement that anchors knee and hip implants firmly to the bone. It is mixed in theatre and applied while soft, then sets hard to hold the implant in place for years.

USED IN **Knee (TKR)** **Hip (THR)** **Revision**

Consistent Dough time
Full range Pack sizes
Batch docs With every consignment

Theatre & Joint Replacement

07 THEATRE EQUIPMENT • BIOTECH BRAND Automatic Tourniquet

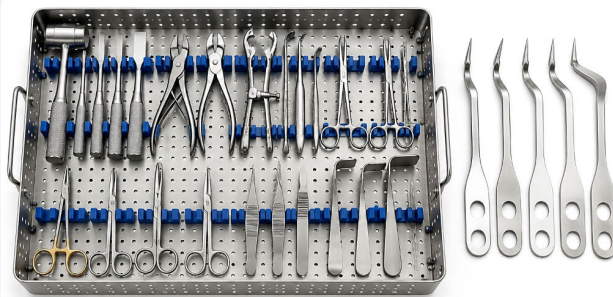

- Digital pressure display
- Air hose connector
- Limb cuff
- Power

Inflates a cuff around the arm or leg to stop blood flow for a while, giving the surgeon a clear, bloodless field. The digital unit holds the set pressure and time on screen.

USED IN **Knee** **Hand & wrist** **Foot & ankle** **Limb surgery**

1 year Warranty **Digital** Pressure control **Wide range** Cuff sizes

08 OT INSTRUMENTS • SUPPLIED ON DEMAND Hospital OT Instrument Sets

- Mallet & osteotomes
- Forceps, scissors & retractors
- Perforated sterilisation tray
- Bone cutters & rongeurs
- TKR spikes / retractors

Stainless-steel hand instruments for holding, reducing and fixing bone, plus elevators and retractors. Each set is assembled to match your theatre's standard list.

USED IN **Trauma** **Fracture fixation** **General ortho**

Brushed Stainless steel **Tray-ready** For sterilisation **Your list** Configured to order

09 JOINT REPLACEMENT • CE / ISO 13485 OEM LINES

Total Knee & Total Hip Systems

Replaces a worn-out knee or hip joint with metal and polyethylene parts that restore smooth, pain-free movement. We supply the implants with every instrument needed, on complete OR trays, and train your staff at the first shipment.

KNEE (TKR)	Cruciate-retaining and posterior-stabilised options; full size runs; polyethylene inserts.
HIP (THR)	Cemented and uncemented stems, acetabular shells, ceramic and poly heads; bipolar options.
INSTRUMENTS	IM alignment rods, cutting blocks, trials, broaches and extractors, trayed per set.
SUPPORT	Territory manager attends first surgeries; repeat tray logistics handled by us. Primary & revision.

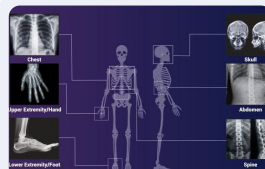

- Femoral component (knee)
- Tibial baseplate
- Femoral stem (hip)
- Polyethylene insert
- Acetabular shell & head
